Council Action: _____ Date: _____

The minutes of the Fairmont City Council meeting held on Monday, September 12, 2022, at the City Hall Council Chambers.

Mayor Deborah J. Foster called the meeting to order at 5:30 p.m.

Council Members Wayne Hasek, Britney Kawecki, Randy Lubenow, Michele Miller and Bruce Peters were present. Also in attendance: City Administrator Cathy Reynolds, Public Works Director/City Engineer Troy Nemmers, Finance Director Paul Hoye, Police Chief Mike Hunter, City Clerk Patricia Monsen and City Attorney Mark Rahrlick, via telephone.

Council Member Peters made a motion to approve the agenda as presented. Council Member Miller seconded the motion and the motion carried.

During Public Comment, Marlene Johnson of 1426 Holland Street voiced her dissatisfaction with the repair of her boulevard/lawn from the resurface project on Holland Street. Chuck Omvig of 806 Albion Avenue read a letter on behalf of the Charter Commission supporting their request for additional funding. Leanne Erickson and several members of Arc Southwest requested that the city consider getting the Human Rights Commission started again. Joe Loughmiller of 207 Sisseton Drive, representing a local citizens' group called Keep Fairmont Functional spoke on educating voters about the proposed Charter amendments. Jay Maynard of 1831 Oakwood thanked the City Street and Electric Department for their dedication and work on during a recent storm. Jeff Schuett of 1306 Holland Street voiced concerns with the proposed campground in that neighborhood.

Council Member Miller made a motion to approve the Consent Agenda. Council Member Hasek seconded the motion and the motion carried. Items on the Consent Agenda were: minutes from the August 22, 2022 city council meeting; Transient Merchant Application for Country Fresh Farms; Event Permit for the Fairmont Student Council for the Homecoming Parade; Closure of Woodland Avenue for Halloween; Temporary On-Sale Liquor Licenses for Martin County Preservation Association, d/b/a Red Rock Center for November 4, 2022 and December 16, 2022; Purchase of lift station equipment for Johnson Street (Purchase Order 14388); and Purchase of lift station equipment for Woodland Avenue/Lake Park Boulevard (Purchase Order 14389).

Mayor Foster opened the public hearing on proposed **Ordinance 2022-11**, an ordinance updating Chapter 25; Article IX Stormwater Management. Jay Maynard of 1831 Oakwood stated that he hopes that the changes won't make it harder for people to do projects. Council Member Peters made a motion to close the public hearing. Council Member Miller seconded the motion and the motion carried.

Council Member Kawecki made a motion to approve the Charter Commission's request for additional funds due to the fact that they requested certain documents and entire binders were produced and they were charged for the entire cost. Council Member Lubenow seconded the motion. On roll call: Council Member Lubenow voted aye. Council Members Hasek, Kawecki, Miller and Peters voted nay. Mayor Foster declared said motion failed. Council Member Lubenow made a motion to table this agenda item until the next meeting. Council Member Kawecki seconded the motion. On roll call: Council Members Kawecki, Lubenow, Miller, Peters and Hasek voted aye. No one voted nay. Mayor Foster declared said motion passed.

Council Member Lubenow made a motion to approve **Resolution 2022-36** awarding the screen modification project at the wastewater treatment plant to Beemer Companies of Fairmont in the amount of \$688,990. Council Member Miller seconded the motion and the motion carried.

Council Member Lubenow made a motion to authorize the purchase of shade structures at the Winnebago Avenue Sports Complex and the Jeffery Kot Fields. Council Member Miller seconded the motion and the motion carried.

Council Member Peters made a motion to approve the adoption of position pointing and non-union pay scale. Council Member Hasek seconded the motion. On roll call: Council Members Miller, Peters and Hasek voted aye. Council Members Lubenow and Kawecki voted nay. Mayor Foster declared said motion passed.

Council Member Lubenow made a motion to approve **Resolution 2022-33** approving the HRA levy and forwarding it to the Martin County Auditor. Council Member Peters seconded the motion and the motion carried.

Council Member Peters made a motion to approve **Resolution 2022-34**, adopting the proposed tax levy with the addition of \$50,000 for debt service for 2023. Council Member Hasek seconded the motion. On roll call: Council Members Miller, Peters and Hasek voted aye. Council Members Kawecki and Lubenow voted nay. Mayor Foster declared said motion passed.

Council Member Peters made a motion to approve **Resolution 2022-35**, adopting the proposed budget with the addition of \$50,000 for debt service for 2023. Council Member Miller seconded the motion. On roll call: Council Members Peters, Hasek and Miller voted aye. Council Members Kawecki and Lubenow voted nay. Mayor Foster declared said motion passed.

Nemmers reported that the AMI (Advanced Metering Infrastructure) Project should be started in October. The City is asking for the public's assistance in getting into their homes to access the meters.

Reynolds reported that FEDA entered into a preliminary agreement with a developer for the sale of eight lots in the Whitetail Ridge Subdivision. The developer is planning on building five twin-homes and is hoping to begin yet this Fall. There has already been five new home building permits this year. A special thank you to the Fire Department for their Taps Ceremony in Remembrance of 911.

Council Member Peters reported that FEDA is also still working on trying to get ready to sell the Incubator building.

Council Member Miller reported that the CER Fall catalog has been delayed from the printer and that classed being offered can be found online.

Council Member Lubenow reminded citizens that the city-wide cleanup is tomorrow and if anyone needs help, to give him a call. His information is located on the city's website.

A motion was made by Council Member Miller, seconded by Council Member Hasek and carried to adjourn the meeting at 7:56 p.m.

Deborah J. Foster, Mayor

Fairmont City Council
September 26, 2022

Agenda Item: 6.B.1

From: Paul Hoyer, Finance Director
To: Mayor and City Council

Subject: Accounts Payable September 2022

Policy/Action Requested: To approve accounts payable for September 2022.

Vote Required: Simple Majority Roll Call

Recommendation: Approval of the payment of the September 2022 bills.

Overview:

Budget Impact: N/A

Attachments: September 2022 Bills – Attached at the end of the Council Agenda

Council Action: _____ Date: _____

Fairmont City Council
September 26, 2022

Agenda Item: 7.1

From: Peter Bode, Planner & Zoning Official
To: Mayor and City Council

Subject: Ordinance 2022-12 – Regulating the Discharge of Manure within City Limits

Policy/Action Requested: Motion to close the public hearing.

Vote Required: Simple Majority Roll Call

Recommendation: Approval

Overview: On June 27, 2022, the City Council adopted an emergency interim ordinance placing a moratorium on the spreading of manure within city limits and directed staff to study a permanent update to ordinances. After reviewing existing ordinances, the need to update them became apparent through the complaints received from several residents regarding odors emanating from the discharge of manure in residential districts.

In addition to conversations with the Minnesota Pollution Control Agency, Martin County, and city residents, staff reached out to farmers and owners of farmland in city limits to study the topic, advise them of the interim ordinance, and gather input on the development of a permanent ordinance. Recognizing that Fairmont is an agricultural community, staff’s goal in drafting this proposed ordinance was to allow area farmers to continue their usual responsible practices while also protecting residents from excessive manure spreading.

In discussing with farmers in-person and over the phone, staff gathered feedback about how close to residences manure should be spread – ranging from 100 to 500 feet. 200 feet emerged as a reasonable distance from these conversations. Additionally, general agreement could be found that manure should be immediately incorporated into the soil.

Ordinance 2022-12 as drafted amends the City’s nuisance codes to do three basic things:

1. Prohibits manure from being discharged on land zoned for residential or business use. This land (yellow and red on the attached map) is the closest to the center of the developed city where commercial farming is already prohibited unless as an existing use. All business districts are intended for some form of residential use, and the Comprehensive Plan envisions that residential and business districts will blend to a degree in the future.
2. Allows manure to be spread on agricultural and industrial land that is 200 feet away from the boundary of residential and business zones. Most farmland within city limits is zoned agricultural or industrial (green and purple on the attached map).
3. Requires that manure be incorporated into the soil immediately following discharge.

Staff recommend Council approve the ordinance.

ORDINANCE 2022-12

**STATE OF MINNESOTA
COUNTY OF MARTIN
CITY OF FAIRMONT**

AN ORDINANCE AMENDING CHAPTER 17 OF THE CITY CODE TO ESTABLISH REGULATIONS ON THE DISCHARGE OF MANURE WITHIN THE CITY LIMITS

WHEREAS, the Fairmont City Council adopted an interim ordinance establishing a moratorium on the discharge of manure within the City, to expire October 1, 2022, with the purpose of protecting the planning process and the health, safety, and welfare of the citizens of Fairmont; and,

WHEREAS, the Fairmont City Council authorized a study to be conducted to update the City’s nuisance ordinances and to determine whether and to what extent it should regulate the discharge of manure within the City; and,

WHEREAS, the City of Fairmont engaged in conversations with area farmers, residents, the County of Martin, and the Minnesota Pollution Control Agency to develop a local ordinance regulating the discharge of manure; and,

WHEREAS, The Fairmont City Council makes the following findings of fact to support its decision:

1. The City of Fairmont has not adopted a nuisance ordinance regulating the discharge of manure within the City.
2. Unregulated discharge of manure can be injurious to health, emanate indecent or offensive odors, and obstruct the comfortable enjoyment of life or property.
3. Regulations set upon the discharge of manure can prevent a nuisance occurring by establishing setbacks from residential property, allowing manure to be discharged in certain zones, and requiring manure be incorporated immediately after discharge.
4. Existing state and county controls related to the discharge of manure do not prevent a nuisance from occurring due to the action’s proximity to residential property.
5. Minnesota Statutes 462.357 Subd. 1d. grants cities the authority to regulate land use by providing for the prevention or abatement of nuisances.

NOW THEREFORE, the City of Fairmont does ordain that Fairmont City Code, Chapter 17 – Nuisances shall be amended by inserting the following:

“Section 17-3. Discharge of Manure

(a) **Purpose.** Minnesota Statutes 462.357 Subd. 1d. grants cities the authority to regulate land use by providing for the prevention or abatement of nuisances. A nuisance is defined by Minnesota Statutes 561.01 as anything which is injurious to health, indecent or offensive to the senses, an obstruction to the free use of property so as to interfere with the comfortable enjoyment of life or property. Unregulated discharge of manure can be injurious to health, emanate indecent or offensive odors, and obstruct the comfortable enjoyment of life or property. Regulations set upon the discharge of manure can prevent a nuisance occurring by establishing setbacks from residential property, allowing manure to be discharged in certain zones, and requiring manure be incorporated immediately after discharge.

(b) Definitions.

Discharge as referenced in this section shall have the following meaning: the application of manure to land by a person using any form of equipment by leaking, pumping, pouring, emitting, emptying, dumping, escaping, seeping, leaching, or any other means.

Liquid manure as referenced in this section shall have the following meaning: poultry, livestock, or other animal excreta or a mixture of excreta with feed, bedding, precipitation, or other materials in liquid form.

Manure as referenced in this section shall have the following meaning: poultry, livestock, or other animal excreta or a mixture of excreta with feed, bedding, precipitation, or other materials, in solid form, liquid form, or any combination thereof.

Incorporate as referenced in this section shall have the following meaning: to work or otherwise integrate the manure into the soil.

Person as referenced in this section shall have the following meaning: an individual, partnership or business, whether or not organized as a separate legal entity.

(c) General Provisions.

1. Manure may only be discharged inside city limits in accordance with the following limitations and requirements:

a. Property Zoned R-1, R-2, R-3, R-4, R-2S, B-1, B-2, B-3: No manure shall be discharged.

- b. Property Zoned I-1, I-2, A: Manure may be discharged in compliance with all requirements of this section.
2. Regardless of zoning, no liquid manure may be discharged within 200 feet of the property line of any parcel zoned R-1, R-2, R-3, R-4, R-2S, B-1, B-2, or B-3.
3. Regardless of zoning, liquid manure shall be incorporated into the soil immediately following discharge.

(d) Violations and Enforcement.

1. **Violation a Misdemeanor.** Any person who shall violate any provision of this section or who shall fail to comply with any provisions hereof shall be guilty of a misdemeanor. Each day that a violation continues shall constitute a separate offense.
2. **Stop Work Orders.** Whenever any work is being performed contrary to the provisions of this Interim Ordinance, the City may order the work stopped by written notice personally served upon the person performing the work or upon the owner of the property upon which the work is being performed. All activities shall cease and desist until subsequent written authorization to proceed is received from the City
3. **Injunctive Relief and other Remedies.** In the event of a violation of a provision of this section, the City may institute appropriate actions or proceedings, including requesting injunctive relief, to prevent restrain, correct, or abate such violations.”

Passed and adopted by the City Council of Fairmont, Minnesota, this 10th day of October, 2022.

ORDINANCE 2022-08

AN INTERIM ORDINANCE ESTABLISHING A MORATORIUM ON THE DISCHARGE OF MANURE WITHIN THE CITY LIMITS

WHEREAS, the Fairmont City Council has not adopted an ordinance regulating the discharge of manure within the City; and

WHEREAS, the performance standards in the City Code regulating odors requires updating; and

WHEREAS, complaints have been received from multiple property owners regarding odors emanating from the discharge of manure in residential districts; and

WHEREAS, the City requires time to evaluate the impact of the discharge of manure within the City and the impact of those actions on the health, safety and welfare of its residents; and

WHEREAS, the City Council hereby authorizes a study to be conducted to update the City's nuisance ordinances and to determine whether and to what extent it should regulate the discharge of manure within the City; and

WHEREAS, the City Council has the authority to adopt an Interim Ordinance/moratorium during which time the City will conduct a study on the impact of the discharge of manure within the City and the impact of those actions on the health, safety and welfare of its residents; and

WHEREAS, the City Council makes the following Findings of Fact:

1. The City Council has authorized a study to be conducted for the purpose of considering whether to update the City's performance standards and to determine whether and to what extent it should regulate the discharge of manure within the City.
2. This Interim Ordinance is intended to protect the health, safety and welfare of City of Fairmont residents and to protect the planning process.

NOW, THEREFORE, the City Council of the City of Fairmont does Ordain:

1. **Intent and Purpose.** This Interim Ordinance is adopted with the intent and purpose of:

- a. To protect the planning process under the authority of Minnesota Statutes Section 462.355.
- b. To protect the health, safety, and welfare of the citizens of Fairmont.

2. **General Provisions.** This Interim Ordinance shall apply to land located within the city limits.

3. **Definitions.**

“Discharge” as referenced in this Interim Ordinance shall have the following meaning: The application of manure to land by leaking, pumping, pouring, emitting, emptying, dumping, escaping, seeping, leaching, or any other means.

“Manure” as referenced in this Interim Ordinance shall have the following meaning: Poultry, livestock, or other animal excreta or a mixture of excreta with feed, bedding, precipitation, or other materials, in solid form, liquid form, or any combination thereof.

4. **Interim Prohibition on Land Use.** The City Council hereby adopts an Interim Ordinance that prohibits the Discharge of Manure within the city limits.

5. **Violations and Enforcement.** Any person, firm or corporation who shall violate any of the provisions hereof or who shall fail to comply with any of the provisions hereof shall be guilty of a misdemeanor. Each day that a violation continues shall constitute a separate offense.

6. **Enforcement.**

- a. **Stop Work Orders.** Whenever any work is being performed contrary to the provisions of this Interim Ordinance, the City may order the work stopped by written notice personally served upon the person performing the work or upon the owner of the property upon which the work is being performed. All activities shall cease and desist until subsequent written authorization to proceed is received from the City.
- b. **Injunctive Relief and other Remedies.** In the event of a violation of this Interim Ordinance, the City may institute appropriate actions or proceedings, including requesting injunctive relief, to prevent, restrain, correct or abate such violations.

c. **Costs of Enforcement Proceedings.** All costs incurred for corrective action may be recovered by the City in a civil action in District Court, or at the discretion of the City the costs may be certified to the County Auditor as a special assessment against the real property. These and other remedies, as determined appropriate by the City, may be imposed upon the responsible person either in addition to, or separate from, other enforcement actions.

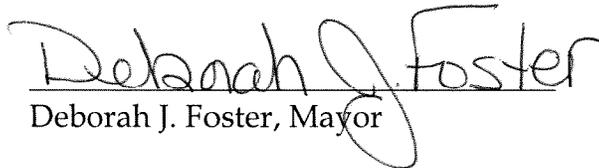

7. **Severability and Validity.** It is hereby declared to be the intention that the provisions of this Interim Ordinance are severable in accordance with the following:

- a. If any court of competent jurisdiction shall adjudge invalid the application of any provision of this Interim Ordinance, such judgment shall not affect any other provisions not specifically included in said judgment.
- b. If any court of competent jurisdiction shall adjudge invalid the application of any provision of this Interim Ordinance to a particular property, such judgment shall not affect other properties.

8., **Effective Date.** This Interim Ordinance shall be in full force and effect from and after its passage and approval, as provided by law, until October 1, 2022, or until final adoption of a separate ordinance regulating the Discharge of Manure, whichever shall first occur.

PASSED, APPROVED AND ADOPTED, this 27th day of June 2022.

Patricia J. Monser, City Clerk

Fairmont City Council
September 26, 2022

Agenda Item: 7.2

From: Cathy Reynolds, City Administrator
To: Mayor and City Council

Subject: Ordinance Regulating Edible Cannabinoid Products

Policy/Action Requested: Motion to close public hearing on Ordinance 2022-13.

Vote Required: ____ Simple Majority ____ Roll Call

Recommendation:

Overview: A new law was enacted at the end of the 2022 legislative session that allows certain edible and beverage products infused with tetrahydrocannabinol (THC) to be sold. Since the enactment of the law, the League of Minnesota Cities has been researching and collecting information from state agencies and stakeholders to answer questions pertaining to local regulatory authority, law enforcement, taxing, and employment. During the July 25, 2022 council meeting we discussed the option of passing a moratorium on the sale of these products inside city limits to allow some additional research to be completed or moving forward with an ordinance regulating the sale of edible THC products. At that meeting council requested that we move forward with drafting an ordinance regulating.

Staff has drafted an ordinance that will require businesses that wish to sell edible THC products in accordance with state statute to apply for a license from the city. This will be handled similar to the tobacco licensing currently completed by the city. In addition to setting out a licensing structure the ordinance imposes additional regulatory requirements on licensees. The main items included in these regulatory requirements are:

1. The licensed premises may not be a moveable place of business.
2. A license must be at least 21 years of age.
3. A licensed business can not be within 300 feet of any school, park, library, public sports field, sports arenas, and all government owned properties.
4. Edible THC may not be sold by a minor.
5. Edible THC products must be sold in a face-to-face exchange, no vending machines.
6. Edible THC products can not be sold through the use of self-service merchandising displays. (Must be behind the counter, like tobacco.)
7. No free samples, donations, or sale for nominal cost may occur.

Additionally, the ordinance makes it a misdemeanor for a person under the age of 21 to purchase, have in their possession, or use edible cannabinoid products. The state statute makes it illegal to sell to someone under the age of 21 but does not address the possession or use of the products.

Staff has noticed this draft ordinance for a public hearing to allow members of the public to express their thoughts or concerns on the regulatory framework.

ORDINANCE NO. 2022-13

STATE OF MINNESOTA)
COUNTY OF MARTIN) ss
CITY OF FAIRMONT)

ORDINANCE REGULATING THE SALE OF CERTAIN EDIBLE AND BEVERAGE PRODUCTS INFUSED WITH TETRAHYDROCANNABINOL (THC) PRODUCTS

WHEREAS, during the 2022 Minnesota Legislative Session, the legislature passed H.F. number 4065 as Chapter 98 of the session laws; and,

WHEREAS, as part of Chapter 98, Article 13 makes several changes to Minnesota Statutes section 151.72 regarding the sale of certain cannabinoid (CBD products for human or animal consumption; and,

WHEREAS, the changes to Minnesota Statutes section 151.72 allow the sale of certain cannabinoid products for human or animal consumption; and,

WHEREAS, the City of Fairmont desires to regulate the sale of cannabinoid products inside city limits to protect the health, safety and welfare of its residents.

NOW THEREFORE the City of Fairmont does ordain the following shall be inserted in the Fairmont City Code:

“Article VI. Cannabinoid Dealers

14.70 Definitions

- (a) *Certified Hemp* has the meaning given in Minn. Stat. § 151.72, subd. 1.
- (b) *Edible Cannabinoid Product* has the meaning given in Minn. Stat. § 151.72, subd. 1.
- (c) *Hemp* has the meaning given in Minn. Stat. § 151.72, subd. 1.
- (d) *Movable place of business* means a business whose physical location is not permanent or is capable of being moved or changed, including, but not limited to, any business that is operated from a kiosk, other transportable structure or shelter, or a motorized or nonmotorized vehicle.
- (e) *Non-intoxicating cannabinoid* has the meaning given in Minn. Stat. § 151.72, subd. 1.
- (f) *Self-service merchandising* means open displays of edible THC products in any manner where any person has access to the edible THC products without the assistance or intervention of the licensee or licensee’s employee.
- (g) *THC* means tetrahydrocannabinol.
- (h) *Vending machine* means any mechanical, electric or electronic, self-service device which, upon inserting money, tokens, or any other form of payment, dispenses edible THC products and including vending machines equipped with manual, electric or electronic locking devices.

14.71 Edible Cannabinoid Dealer License

No person shall, directly or indirectly keep for retail sale, sell at retail, or otherwise dispose of any

edible cannabinoid product in any form unless a license therefor shall first be obtained by the city.

- (a) Separate licenses are required for the sale of edible cannabinoid products at more than one (1) place of business.
- (b) No license may be transferred to another location, or person, without the approval of Council.
- (c) Licenses must be displayed and plainly visible to the public at the licensed location.
- (d) The fee for an edible cannabinoid license shall be set by resolution of the council.

14.72 Ineligibility. No license shall be issued under this section to:

- (a) A moveable place of business.
- (b) A person under twenty-one (21) years of age.
- (c) A person who has knowingly misrepresented or falsified information on the license application.
- (d) A person who has been convicted within the past five (5) years of any violation of a federal, state, or local law, ordinance provision or other regulation governing the manufacture, sale, distribution or possession for sale or distribution of any products containing THC.
- (e) A person who is prohibited by federal, state, or other local law, ordinance, or other regulation from holding a license.
- (f) A person who does not have, or at the time of the issuance of a license at least one permanent physical premises in the City on which the licensed business will be located.
- (g) Any location within 300 feet of any school, park, library, public sports fields, sports arenas, and all government owned properties.

14.73 Exemption.

This Article does not apply to the sale of any product by a registered medical cannabis manufacturer pursuant to Minnesota Statutes 152.22 to 152.37.

14.74 Inspections.

Any police officer, building inspector, or any properly designated officer or employee of the city shall have the unqualified right to enter, inspect and search the public portion of the premises of a licensee under this Article during business hours without a search warrant.

14.75 Regulations

A licensee holder under the terms of this Article must comply with the following regulations.

- (a) No product containing any cannabinoid or tetrahydrocannabinol extracted or otherwise derived from hemp may be sold to any individual who is under the age of 21.
- (b) No minor shall be employed to sell edible cannabinoid products in any establishment holding a license issued pursuant to this article.
- (c) A licensee may sell edible THC products only in a direct face-to-face exchange between the licensee or the licensee's employee and the consumer.
- (d) No person may sell or dispense any edible THC product through the use of vending machines or by means of delivery.
- (e) No person may sell or dispense any edible THC product through the use of self-service merchandising displays.

- (f) No person may distribute samples of any edible THC product free of charge or at a nominal cost. The distribution of edible THC products as a free donation is prohibited.
- (g) No person may sell any edible THC product that is not in compliance with the requirements of Minn. Stat. § 151.72, including but not limited to the packaging, labeling, and other requirements for edible cannabinoids provided by Minn. Stat. § 151.72, subdivisions 4, 5, and 5a.
- (h) A licensee is responsible for the conduct of their place of business and the conditions of order in it. The act of an employee of the licensee is deemed the act of the licensee as well, and the licensee is liable for all penalties provided by this section equally with the employee.

14.76 Underage Possession/Use

No person under the age of 21 may purchase, have in their possession, or use edible cannabinoid products.

14.77 Violations and Enforcement

Any person, firm or corporation who shall violate any of the provisions hereof or shall fail to comply with any of the provisions hereof shall be guilty of a misdemeanor.”

Passed by the City Council of the City of Fairmont, Minnesota, this 10th day of October 2022.

Subject: 2023 Proposed Tax Levy

Policy/Action Requested: To approve Amended Resolution 2022-34, adopting the proposed tax levy for 2023

Vote Required: Simple Majority Roll Call

Recommendation: Approval

Overview: The City is required to list the amount of reserves that are being budgeted to fund the principal and interest payments on its bonds in the levy resolution for certification. This language was missing from the resolution that the Council approved at the 9/12/2022 council meeting. The addition of this language does not change anything to the budget or the levy that was approved. This resolution needs to be approved and certified to the County by 9/30/2022.

AMENDED RESOLUTION NO. 2022-34

STATE OF MINNESOTA)

SS:

COUNTY OF MARTIN)

A RESOLUTION ADOPTING THE 2023 PROPOSED PROPERTY TAX LEVY AND ORDERING ITS CERTIFICATION TO THE MARTIN COUNTY AUDITOR

WHEREAS, Minnesota State Statutes require that the proposed property tax levy for the coming year be certified to the County Auditor by September 30; and,

WHEREAS, the City of Fairmont will use \$27,759 of reserves to lower the debt levy for 2023.

NOW THEREFORE, BE IT RESOLVED, that the following proposed property tax levy be certified to the Martin County Auditor:

Non-Debt Levy	\$4,933,410
Debt Service Levy	<u>1,557,083</u>
Total <u>Proposed</u> Property Tax Levy	<u>\$6,490,493</u>

BE IT FURTHER RESOLVED, that the above named mentioned total tax levy be established in the following breakdown:

1. General Operations	\$3,929,798
2. Special Assessment Debt	1,557,083
3. Capital Projects	903,612
4. EDA	<u>100,000</u>
TOTAL <u>PROPOSED</u> TAX LEVY	<u>\$6,490,493</u>

PASSED, APPROVED AND ADOPTED this 26th day of September 2022.

Deborah J. Foster, Mayor

ATTEST:

Patricia J. Monsen, City Clerk

Fairmont City Council
September 26, 2022

Agenda Item: 8.2

From: Troy Nemmers, PE, Director of Public Works/City Engineer
To: Mayor and City Council

Subject: Updates to the City’s Stormwater Management Ordinance

Policy/Action Requested: Motion to approve Ordinance 2022-11

Vote Required: ____ Simple Majority X Roll Call

Recommendation: Approval

Overview: The Minnesota Pollution Control Agency has updated the requirements for MS4 permittees regarding stormwater and sediment and erosion control. These changes require the city to update its current stormwater management ordinance (Chapter 25; Article IX). A public hearing was held on September 12th to discuss the reasons for the ordinance and some of the changes that are resulting from the most recent permit update. A quick summary of a few changes include; pet waste clean-up, salt storage requirements, and water quality volume changes. This ordinance will go into effect immediately for land disturbing activities.

Budget Impact: N/A

Council Action: _____ Date: _____

ORDINANCE 2022-11

**AN ORDINANCE REPEALING AND REPLACING IN ITS ENTIRETY,
FAIRMONT CITY CODE, CHAPTER 25 UTILITIES,
ARTICLE IX STORMWATER MANAGEMENT**

WHEREAS, the City of Fairmont is required to establish standards and requirements for stormwater conveyance, treatment and discharge within the City of Fairmont; erosion and sediment control measures to be taken during the development of and alterations to lands within the City of Fairmont; the regulation of non-stormwater discharges to the City of Fairmont municipal separate storm sewer system (MS4); and,

WHEREAS, the City’s current Stormwater Ordinance was last updated March 12, 2018 by Ordinance 2018-11; and,

WHEREAS, the purpose of these ordinances are to protect public health, safety and general welfare, property and the environment; and,

WHEREAS, the City of Fairmont desires to administer and implement stormwater best practices (BMPs) as required by federal (United States Environmental Protection Agency) and state (Minnesota Pollution Control Agency) law.

NOW THEREFORE THE CITY OF FAIRMONT DOES HEREBY ORDAIN, that Fairmont City Code, Chapter 25 Utilities, Article IX Stormwater Management is hereby repealed in its entirety and replaced to read as follows:

ARTICLE IX. STORMWATER MANAGEMENT

Sec. 25-1000.-Purpose and policy.

- (a) This ordinance establishes standards and requirements for stormwater conveyance, treatment and discharge within the City of Fairmont; erosion and sediment control measures to be taken during the development of and alterations to lands within the City of Fairmont; and regulation of non-stormwater discharges to the City of Fairmont municipal separate storm sewer system (MS4). The purpose of this ordinance is to protect public health, safety and general welfare, property and the environment, and administer and implement stormwater best management practices (BMPs) as required by federal (United States Environmental Protection Agency) and state (Minnesota Pollution Control Agency) law.

(b) The Objectives of this ordinance are:

- 1 To promote the awareness and importance of water quality within the city, specifically protecting and enhancing the quality of the Fairmont chain of lakes.
- 2 To maintain compliance with the Minnesota Pollution Control Agency's NPDES/SDS Small Municipal Separate Storm Sewer Systems General Permit MNR040000 (MS4 Permit), issued November 16, 2020.
- 3 To regulate the contribution of pollutants and prohibit illicit connections and discharges to the City of Fairmont's MS4.
- 4 To regulate land disturbing activity, installation, operations, maintenance and replacement of the stormwater system, and protect and prevent the discharge of sediment into public and/or private lands, public infrastructure, wetlands and waters of the State.
- 5 To establish legal authority to carry out all inspections, monitoring and enforcement procedures necessary to comply with this ordinance.

(c) This ordinance shall apply to all water entering the stormwater system generated on any developed and undeveloped lands unless exempted by the City of Fairmont.

Section 25-1001.-Definitions.

Unless the context specifically indicates otherwise, the following terms as used in this ordinance, shall have the meanings designated.

Applicant. Any person or group that applies for a permit to allow land disturbing activities. Applicant also means that person's agents, employees, and others acting under this person's or group's direction. The term "applicant" also refers to the permit holder or holders and the permit holder's agents, employees, and others acting under this person's or group's direction.

Best Management Practices (BMPs). Erosion and sediment control and water quality management practices that are the most effective and practicable means of controlling, preventing and minimizing degradation of waters of the state, including avoidance of impacts, prohibitions of practices, general housekeeping practices, pollution prevention and educational practices, operating and maintenance procedures, and other applicable management practices.

Builder, Commercial. Any building contractor engaging in work other than work performed under a license from the State of Minnesota as a residential building contractor, remodeler or specialty contractor in the business of contracting or offering to contract to improve residential real estate, all terms as defined by Minnesota Statute.

Builder, Residential. Any building contractor engaging in work performed under a license from the State of Minnesota as a residential building contractor, remodeler or specialty contractor in the business of contracting or offering to contract to improve residential real estate, as defined by Minnesota Statute.

Building Construction. The construction of any principle building or accessory structure or modification of a parcel of land or platted lot.

City. The City of Fairmont, the Fairmont City Council.

Common Plan of Development. A contiguous area where multiple separate and distinct land disturbing activities may be taking place at different times, on different schedules, but under one proposed plan. One plan is broadly defined to include design, permit application, advertisement or physical demarcation indicating that land disturbing activities may occur.

Construction Activity. Clearing, grading, and excavating, that result in land disturbance. This includes a disturbance to the land that results in a change in the topography, existing soil cover, both vegetative and nonvegetative, or the existing soil topography that may result in accelerated stormwater runoff that may lead to soil erosion and movement of sediment.

Developer. Any person, firm, corporation, sole proprietorship, partnership, state agency, or political subdivision engaged in a land disturbance activity.

Director. The City of Fairmont Director of Public Works/City Engineer or authorized designee.

DNR Catchment Area. The Hydrologic Unit 08 areas delineated and digitized by the Minnesota DNR. The catchment areas are available for download at the Minnesota Geospatial Commons website. DNR catchment areas may be locally corrected, in which case the local corrections may be used.

Easement. A grant by a property owner for the use of a strip of land for public purposes of constructing and maintaining utilities and transportation ways including, but not limited to, utility lines, telephone lines, storm sewer or storm drainage ways and gas lines.

Energy Dissipation. Methods employed at pipe outlets to prevent erosion caused by the rapid discharge of water scouring soils.

Erosion Prevention: Measures employed to prevent erosion such as soil stabilization practices, permanent cover, or construction phasing.

Final Stabilization. All soil disturbing activities at the site have been completed and all soils must be stabilized by a uniform perennial vegetative cover with a density of seventy (70) percent of the expected final growth density over the entire pervious surface area, or other equivalent means necessary to prevent soil failure under erosive conditions and:

- (a) All drainage ditches, constructed to drain water from the site after construction is complete, must be stabilized to exclude erosion;
- (b) All temporary synthetic and structural erosion prevention and sediment control BMPs (such as silt fence) must be removed. BMPs designed to decompose on site (such as some compost logs) may be left in place;
- (c) The Permittee must clean out all sediment from conveyances and from temporary sedimentation basins that are to be used as permanent water quality management basins. Sediment must be stabilized to prevent it from being washed back into the basin and/or into conveyances or drainage ways discharging off-site or to surface waters. The cleanout of permanent basins must be sufficient to return the basin to design capacity; and
- (d) The permanent stormwater management system is constructed, meets all of the required design parameters, and is functioning as designed.

Fully Reconstructed. Areas where impervious surfaces have been removed down to the underlying soils. Activities such as structure renovation, mill and overlay projects, and other pavement rehabilitation projects that do not expose the underlying soils beneath the structure, pavement, or activity are not considered fully reconstructed. Maintenance activities such as catch basin repair/replacement, utility repair/replacement, pipe repair/replacement, lighting, and pedestrian ramp improvements are not considered fully reconstructed.

Green Infrastructure. A wide array of practices at multiple scales that manage wet weather and that maintains or restores natural hydrology by infiltrating, evapotranspiration, or harvesting and using stormwater. On a regional scale, green infrastructure is the preservation or restoration of natural landscape features, such as forests, flood plains and wetlands, coupled with policies such as infill and redevelopment that reduce the overall imperviousness in a watershed. On a local scale, green infrastructure consists of the site and neighborhood-specific practices such as bioretention, trees, green roofs, permeable pavements and cisterns.

Hazardous Materials. Any material, substance, waste or combination thereof, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may cause, or significantly contribute to, a substantial present or potential hazard to human health, safety, property, or the environment when improperly treated, stored, transported, disposed, or otherwise managed.

High Flow Bypass. A function of an inlet device that allows a certain flow of water through, but diverts any higher flows away. High flow bypasses are generally used for BMPs that can only treat a designed amount of flow and that would be negatively affected by higher flows.

Illicit Connections. Any drain or conveyance, whether on the surface or subsurface that allows an illicit discharge to enter the stormwater system including, but not limited to, any conveyances that allow non-stormwater discharge including sewage, process wastewater and wash water to enter the stormwater system and any connections to the stormwater system

from indoor drains and sinks, regardless of whether they had been previously allowed, permitted or approved by the County or City; or any drain or conveyance connected from a commercial or industrial land use to the stormwater system that has not been documented in plans, maps or equivalent records and approved by the City.

Illicit Discharge. Any direct, indirect or accidental non-stormwater discharge to the stormwater system, except as exempted in this ordinance.

Impaired Water. Waters identified as impaired by the Minnesota Pollution Control Agency, and approved by the USEPA, pursuant to section 303(d) of the Clean Water Act (33 U.S.C. § 303(d)).

Impervious Surface. A constructed hard surface that either prevents or retards the entry of water into the soil and causes water to run off the surface in greater quantities and at an increased rate of flow than prior to the development. Examples include rooftops, sidewalks, patios, driveways, parking lots, storage areas, compacted gravel, concrete, asphalt, or gravel roads. **Bridges over surface waters are considered impervious surfaces.**

Industrial Activity. Activities subject to NPDES Industrial Stormwater Permits as defined in 40 CFR, Section 122.26 (b)(14).

Land Development (Develop). The process whereby improvement to a single lot or to an entire site, occurs in one continuous process or in more than one distinct phase, including but not limited to the following activities: site grading; installation of utilities; construction of public streets; construction or grading of drainage ways; other grading or filling of any area within the site; grading of building pad areas; utility hookups; construction of buildings; parking lots; driveways; storage areas; private streets; and any other construction or land disturbing activity within the subject property site.

Land Disturbing Activity. Any activity that results in a change or alteration in the existing ground cover (both vegetative and non-vegetative) and/or the existing soil topographs. Land disturbing activities include, but are not limited to, development, redevelopment, demolition, excavating, grading, clearing, filling, stockpiling, hauling, construction, reconstruction and borrow pits. Routine vegetation management, and mill and overlay/resurfacing activities that do not alter the soil material beneath the pavement base, are not considered land disturbance.

Land Disturbance Permit (LDP). A permit issued by the City for the control of pollutants, erosion, sediment, and design of post construction stormwater management facilities during land disturbing activities.

***Linear Project.* Construction of new or fully reconstructed roads, trails, sidewalks, or rail lines that are not part of a common plan of development or sale. For example, roads being constructed concurrently with a new residential development are not considered linear projects because they are part of a common plan of development or sale.**

Municipal Separate Storm Sewer System (MS4). The system of conveyances (including sidewalks, roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, constructed channels or storm drains) owned or operated by a state, city, town, borough, county, parish, district, association, or other public body and designed or used for collecting or conveying stormwater, and not used for collecting or conveying wastewater, that discharges to waters of the United States.

National Pollutant Discharge Elimination System (NPDES) Stormwater Discharge Permit. A permit issued by the USEPA (or by a State under authority delegated by the USEPA) that authorizes discharge to waters of the United States.

Natural Buffer. An area of undisturbed cover surrounding surface waters within which construction activities are restricted. Natural buffer includes the vegetation, exposed rock, or barren ground that existing prior to commencement of land-disturbing activities.

Normal Wetted Perimeter. The area of conveyance, such as a ditch or channel, that is in contact with flowing water during flow events that are expected to occur from a two-year, 24-hour storm event.

New Development. All construction activity that is not defined as redevelopment.

Non-Stormwater Discharge. Any discharge to the stormwater system that is not composed entirely of stormwater.

Notice of Termination (NOT). A notice given to the City declaring that the site will no longer be discharging stormwater associated with construction activity and all final stabilization of the site has been completed as outlined in the permittee's SWPPP.

Owner(s). A natural person, partnership, firm, association, public or quasi- public corporation, private corporation, or a combination of, with a legal or equitable interest in the parcel of record.

Parcel of Record. A tract, plot, lot, and/or portion of subdivision or other parcel of land, intended as a unit for the purpose, whether immediate or future, of transfer of ownership, possession or for building development.

Permittee. A Land Disturbance Permit holder.

Permanent Cover. Surface types that will prevent soil failure under erosive conditions. Examples include: gravel, concrete, perennial cover, or other landscaped material that will permanently arrest soil erosion. Permittees must establish a uniform perennial vegetative cover (i.e., evenly distributed, without large bare areas) with a density of 70 percent of the native background vegetative cover on all areas not covered by permanent structures, or equivalent permanent stabilization measures. Permanent cover does not include temporary BMPs such as wood fiber blanket, mulch, and rolled erosion control products.

Pollutant. Anything which causes or contributes to pollution, including but not limited to paints, varnishes and solvents; oil and other automotive fluids; non-hazardous liquid and solid wastes and yard wastes; refuse, rubbish, garbage, litter or other discarded or abandoned objects, that may cause or contribute to pollution; floatables; pesticides, herbicides, and fertilizers; hazardous substances and wastes; wastewater, coliform bacteria and pathogens; dissolved and particulate metals; animal wastes; wastes and residues that result from constructing a building or structure; and noxious or offensive matter of any kind.

Pre-Project. The existing condition of the site before project begins.

Preliminary Plat. A drawing of the entire subdivision meeting all requirements of the City's Planning and Zoning Code.

Premises. Any building, lot, parcel or portion of land whether undeveloped or developed, adjacent sidewalks and parking strips.

Public Waters. Waterbasins and watercourses that meet the criteria set forth in Minnesota Statutes, Section 103G.005 subd.15.

Receiving Water. Any lake, river, stream or wetland that receives stormwater discharges from an MS4.

Redevelopment. Any construction activity where, prior to the start of construction, the areas to be disturbed have 15 percent or more of impervious surface(s).

Reduce. Means reduce to the Maximum Extent Practicable (MEP) unless otherwise defined in the context in which it is used.

Seasonally Saturated Soil. The highest seasonal elevation in the soil in a reduced chemical state because of soil voids filled with water causing anaerobic conditions. Seasonally saturated soil is evidenced by the presence of redoximorphic features or other information determined by scientifically established methods of empirical field measurements.

Sediment. Soil particle exposed to movement.

Sediment Control. Methods employed to prevent suspended sediment in stormwater from leaving the site. (e.g. silt fences, compost logs, and storm drain inlet protection)

Stabilization. The exposed ground surface has been covered by appropriate materials such as mulch, staked sod, riprap, erosion control blanket, mats or other material that prevents erosion from occurring. Grass seeding, agricultural crop seeding or other seeding alone is not stabilization. Mulch materials must achieve approximately 90 percent ground coverage (typically 2 ton/acre).

Stormwater. Rainwater runoff, snowmelt and subsurface runoff and drainage.

Stormwater Management Plan. A document that describes the Best Management Practices (BMPs) and activities to be implemented to identify sources of pollution or contamination at a site and the actions to eliminate or reduce pollutant discharges to stormwater, stormwater conveyance systems, and/or receiving waters to the maximum extent practicable.

Stormwater Pollution Prevention Plan (SWPPP). A plan developed to identify the sources of pollution that affect the quality of stormwater discharges from a site and to describe and ensure the implementation of practices to prevent or reduce pollutants in stormwater discharge.

Stormwater Structures. Any structure used to capture, convey and/or treat stormwater runoff including but not limited to catch basins, manholes, sumps, storm drain, outfalls, inlets, outlets, ponds and infiltration/filtration treatment areas.

Structural Stormwater BMPs. Stationary and permanent BMPs designed, constructed and operated to prevent or reduce the discharge of pollutants in stormwater.

Surface Water or Waters. All streams, lakes, ponds, marshes, wetlands, reservoirs, springs, rivers, drainage systems, waterways, watercourses, and irrigation systems whether natural or artificial, public or private, except that surface waters do not include stormwater treatment systems constructed from upland. This permit does not consider stormwater treatment systems constructed in wetlands and mitigated in accordance with the Wetland Conservation Act, Army Corps of Engineer and/or DNR as surface waters.

Water Pollution. The discharge of any pollutant into any waters of the state or the contamination of any waters of the state so as to create a nuisance or render such waters unclean, or noxious, or impure so as to be actually or potentially harmful or detrimental or injurious to public health, safety or welfare, to domestic, agricultural, commercial, industrial, recreational or other legitimate uses, or to livestock, animals, birds, fish or other aquatic life; or (b) the alteration made or induced by human activity of the chemical, physical, biological, or radiological integrity of waters of the state.

Water Quality Standards. Provisions contained in Minn. R. 7050 and 7052.

Water Quality Volume. For construction activity (excluding linear projects), one (1) inch of runoff from the sum of the new and fully reconstructed impervious surfaces created by the project (calculated as an instantaneous volume); or for linear projects, the greater of one (1) inch of runoff from the new impervious surface or one-half (0.5) inch of runoff from the sum of the new and fully reconstructed impervious surfaces created by the project (calculated as an instantaneous volume).

Waters of the State. All streams, lakes, ponds, marshes, watercourses, waterways, wells, springs, reservoirs, aquifers, irrigation systems, drainage systems and all other bodies or

accumulations of water, surface or underground, natural or artificial, private or public, which are contained within, flow through, or border upon the state or any portion thereof. (Minn. Stat. 115.01, § subd. 22.)

Wastewater. Liquid and water-carried industrial or domestic wastes from dwellings, commercial buildings, industrial facilities, and institutions which is discharged into or permitted to enter the City's wastewater treatment system.

Wetlands. Those areas that are inundated or saturated by surface water or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas. Constructed wetlands designed for wastewater treatment are not waters of the state. Wetlands must have the following attributes:

- a. a predominance of hydric soils;
- b. inundated or saturated by surface water or groundwater at a frequency and duration sufficient to support a prevalence of hydrophytic vegetation typically adapted for life in a saturated soil condition; and
- c. under normal circumstances support a prevalence of such vegetation.

Sec. 25-1002 - Illicit Discharge Detection and Elimination.

- (a) *Prohibited Discharges.* No person shall throw, drain or otherwise discharge, cause, or allow others under its control to throw, drain, or otherwise discharge into the City's MS4, any pollutants or waters containing any pollutants.
- (b) *Stormwater Discharge Exemptions.* If not causing a public safety or nuisance, or water quality violation, the following shall not be considered prohibited discharges:
 - 1) Discharges from landscape irrigation, diverted stream flows, rising groundwaters, uncontaminated groundwater infiltration, uncontaminated pumped groundwater, discharges from potable water sources, foundation drains, air conditioning condensation, irrigation water, springs, water from crawl space sump pumps, footing drains, lawn watering, individual residential car washing, flows from riparian habitats and wetlands, dechlorinated swimming pool discharges, water main flushing and street wash water. Discharges associated with dye testing; verbal approval prior to testing is required.
 - 2) Discharges or flow from firefighting and other discharges specified by the City as necessary to protect public health and safety.
 - 3) The prohibition shall not apply to any non-stormwater discharge permitted under an NPDES Permit, waiver or waste discharge order issued to the discharger and administered under the authority of the USEPA, provided that the discharger is in full compliance with all requirements of the permit, waiver or order and other applicable laws and regulations, and provided that written approval has been granted for any discharge to the stormwater system.

(c) *Illicit Connections.* The following are prohibited under this ordinance:

- 1) The construction, use, maintenance or continued existence of illicit connections to the stormwater system is prohibited.
- 2) This prohibition includes, without limitation, previous illicit connections regardless of whether the connection was permissible under law or practices applicable or prevailing at the time of connection.
- 3) It is a violation of this ordinance to connect a line conveying non-stormwater to the City's MS4 or allow these connections to continue.
- 4) Improper connections in violation of this ordinance must be disconnected and redirected, if necessary, to an approved onsite wastewater management system or upon approval, to the City's wastewater treatment system.
- 5) Any drain or conveyance that has not been documented in record drawings, maps or equivalent, and which may be connected to the storm sewer system, shall be located by the owner or occupant of that property within twenty-one (21) days upon receipt of written notice from the City requiring that the location be disclosed. Documentation shall be provided to the City including location of drain or conveyance, drain or conveyance identification as storm sewer, sanitary sewer or other, and the outfall location or point of entry into the City storm sewer, sanitary sewer or other point of discharge.

(d) *Illicit Discharges.* All users shall provide adequate protective procedures and BMP's to prevent discharges of any non-stormwater discharge to the City's MS4.

- 1) Discharges of prohibited waste shall be reported to the Director by the persons responsible for the discharge, or by the owner or occupant of the premises where the discharge occurred, immediately upon obtaining knowledge of the discharge. Such notification will not relieve users of liability for expense, loss or damage to the stormwater system, or any fines imposed on the City under any State or Federal law. The responsible person shall take immediate action as is reasonably possible to minimize or abate the prohibited discharge. The responsible person shall send; detailed written notification describing the illicit discharge to the Director within seven (7) days of knowledge of the discharge. The letter shall include the following information:
 - a. The time and location of the discharge;
 - b. Description of the discharged waste, including estimate of pollutant concentrations;
 - c. Time period and volume of discharge;

- d. Actions taken to correct or control the discharge; and
 - e. A schedule of corrective measures to prevent further discharges.
- 2) *Stormwater Inspections.* The City may conduct tests as necessary to enforce this ordinance, and authorized City employees may enter any property for the purpose of inspection, observation, measurement, sampling, obtaining information or conducting surveys or investigations to enforce this ordinance. Entry shall be made during operating hours unless circumstances require otherwise.
- 3) *Requirement of Best Management Practices.* Compliance with all terms and conditions of a valid NPDES Permit and/or Land Disturbance Permit shall be deemed compliance with the provisions of this section. The City will adopt requirements identifying BMPs for any activity, operation, or facility which may cause or contribute to pollution or contamination of stormwater, the stormwater system or waters of the United States. The owner or operator of such activity, operation or facility shall provide, at the owner's expense, reasonable protection from accidental discharges of prohibited materials or other wastes into the stormwater system or watercourses through the use of the BMPs. Any person responsible for a property or premise that is, or may be, the source of an illicit discharge, may be required to implement, at their expense, additional BMPs to prevent the further discharge of pollutants to the City's MS4.
- 4) *Industrial or Land Disturbing Activity Discharges.* Any person subject to an industrial or construction activity NPDES Stormwater Permit shall comply with all provisions of such permit. Written proof of compliance may be required prior to discharge to the City's MS4.
- 5) *Salt Storage.* All salt users (residents, businesses, commercial applicators, schools, county and state facilities) shall provide adequate best management practices to prevent chloride discharges to the City's MS4.
- a. Salt storage areas must be covered or indoors.
 - b. Designated salt storage areas must be located on an impervious surface.
 - c. Users of salt storage facilities must implement best management practices to prevent salt from causing an illicit discharge. Examples of BMPs include sweeping, diversions, or containment to reduce exposure when transferring material.

Sec. 25-1003 - Land Disturbance Permit

- (a) *Land Disturbing Activities.* All land use activities are subject to this ordinance.

(b) *Land Disturbance Permit.* Prior to any land disturbing activities, the owner or applicant shall be required to obtain a Land Disturbance Permit (LDP).

- 1) The LDP application shall be submitted to the City.
- 2) For projects under (0.5) acres and located on a single family residential parcel the City can provide a smaller checklist and example SWPPP plan for the permittees to follow when creating their SWPPP for submittal. The example residential SWPPP and checklist can be found on the City's website or a hardcopy can be picked up during normal business hours.
- 3) All single family residential land disturbance permits shall be processed within seven (7) calendar days from receipt of a completed application. All other permits shall be processed within thirty (30) calendar days from receipt of a completed application.
- 4) The City of Fairmont shall do one of the following in writing:
 - a. Approve the permit application;
 - b. Approve the permit application subject to such reasonable conditions as may be necessary to secure substantially the objectives of this Ordinance, and issue the permit subject to these conditions; or
 - c. Disapprove the permit application, indicating the reason(s) and procedure for submitting a revised application and/or submission.
 - d. Failure of the City to act on an original or revised Land Disturbance Permit application within seven (7) calendar days for permits under 5,000 S.F. and thirty (30) calendar days for all other permits upon receipt shall authorize the applicant to proceed in accordance with the plans as filed unless such time is extended by agreement between the applicant and the City, or the City notifies the applicant of errors and/or omissions in the application requiring corrective action on the part of the applicant. Once the LDP is approved, permit coverage will be issued to the Permittee.

(c) *Land Disturbance Permit Requirements.* The following are required to obtain a Land Disturbance Permit (LDP):

- 1) All new single family home lots.
- 2) Land disturbing activities that disturb land of greater than or equal to five thousand (5,000) square feet.

- 3) Any disturbance located in Tier A of the City Shoreland District. (Shoreland Management ordinances apply).
- (d) *Residential, Commercial, Multifamily and Industrial Sites:* All persons planning a land disturbing activity, meeting the land disturbance requirements of this ordinance, on an existing parcel of record (building site) shall obtain a LDP, from the City prior to obtaining a Building Permit. A Building Permit will not be issued without an approved LDP.
- (e) *Subdivision Development:* A subdivision owner/developer/agent planning a land disturbing activity, including but not limited to mass grading, site development, roadway and utility installation on an existing parcel of record as shown on the preliminary plat, shall obtain a LDP from the City if meeting the land disturbance requirements of this ordinance. If work will be performed in project phases as specified in the City approved construction plans (each phase needs its own permit). A subdivision owner/developer/agent may have multiple phase permits open for the master plan site. The LDP will not be issued without approved final construction plans and specifications relevant to final plat phasing. Prior to site work or building construction, each parcel of record (building site) must have its own LDP obtained by the owner or applicant as described in the land disturbance permit requirements.
- (f) *Roadway and Utility Installation Construction Plans:* All persons wishing to start a land disturbance project on an existing lot of record for the purposes of the construction of any roadway or utilities, shall submit a Land Disturbance Permit application to the City at the time of the roadway and utility plan if the project meets the requirements of this ordinance. Each parcel of record within a subdivision must obtain a separate LDP.
- (g) *Other Permits:* The LDP does not replace, eliminate or satisfy the need for any other permits required by any other public or private entity.
- (h) *Land Disturbing Exemptions.* The following activities are exempt from Land Disturbance Requirements:
- 1) Any emergency activity that is immediately necessary for the protection of life, property or natural resources.
 - 2) Nursery, home gardening and agricultural operations that are confined to private property.
- (h) *Land Disturbance Permit Exemptions.* The following activities do not require a LDP but are subject to the conditions of this ordinance:
- 1) Maintenance work by City employees.

- 2) Federal, State, County, and other projects where the City does not have regulatory authority.
 - 3) Land disturbing activity disturbing land less than 5,000 square feet and not located in Tier A of Shoreland Management District.
- (j) *Land Disturbance Permit Submittals.* The application for a LDP shall include the following:
- 1) One full set of site plans and a copy of the SWPPP, or portion of the SWPPP that applies to the site, prepared for the MPCA if not included in the full set of site plans.
 - a. The City reserves the right to approve the SWPPP subject to conditions deemed necessary to meet the purpose of this ordinance and the MPCA requirements. City approval of a SWPPP does not mean approval by the MPCA, and MPCA approval of a SWPPP does not mean City approval. At a minimum, all conditions of the MPCA NPDES Construction Permit MN R100001 must be met; in some cases the City may apply stricter standards or require temporary and permanent erosion and sediment control measures in addition to those required by other public or private entities.
 - 2) The following must accompany the LDP application.
 - a. Site Information.
 1. Description of the construction or land disturbing activity to be performed on the property and proposed project schedule;
 2. Approval to work in wetlands from the LGU administering the Wetland Conservation Act, if applicable.
 3. All information included in Appendix A, Site Plan Checklist
 - b. Erosion and Sedimentation Control.
 1. Delineation of all areas to be graded or excavated, and the limits of land disturbing activities;
 2. Identification of measures to be utilized to control erosion and sedimentation within and from the subject property during the project activity as required herein;
 3. Identification of all permanent erosion control measures and a completion schedule.

4. Identification of the location of dirt or soil storage or stock pile areas to be utilized;
5. Identification of all measures to be utilized to protect neighboring property, water bodies, and wetland buffer zones; and
6. Identification, use and maintenance plan of BMPs for temporary erosion and sedimentation control as recommended by the MPCA including but not limited to:
 - i. Perimeter erosion control devices, including but not limited to silt fence, sediment logs, mulch, etc.;
 - ii. **Buffers and/or redundant sediment controls near wetlands, lakes, rivers, and streams following MPCA permit language for buffer size.**
 - iii. Stockpile protection;
 - iv. Phased grading;
 - v. Temporary seeding, mulching, and disc anchoring (with seed and mulch type), erosion control blanketing, (Temporary cover is required for areas in which no land disturbance has occurred for 7 calendar days);
 - vi. Storm drain inlet protection devices;
 - vii. Appropriately protected construction entrance;
 - viii. Removal of all debris, dirt and soil from impervious ground surfaces, including abutting public or private roadways and sidewalks, in connection with the subject property (street sweeping);
 - ix. **Stabilization of ditch and swale bottoms**
 - x. Sediment basins and flow diversions; and
 - xi. Any other erosion and sedimentation control device as deemed necessary by the City.
- c. Final Stabilization BMPs.
 1. Identification of BMPs used to meet final stabilization requirements including landscaping, seeding and stabilization BMPs.
- d. Dewatering BMPs.

1. Identify BMPs so that turbid or sediment-laden waters are treated with appropriate BMPs such that the discharge water does not cause a nuisance condition to receiving waters or adversely affect downstream properties; and
 2. Discharge points identified and adequately protected from erosion and scour.
- e. Management of Solid and Hazardous Wastes.
1. Identification of BMPs for the storage, handling, and disposal of construction products, materials, and wastes per MPCA requirements;
 2. Identification of BMPs for the fueling and maintenance of equipment and vehicles;
 3. Identification of BMPs for spill prevention and response; and
 4. Identification of BMPs for the management and containment of concrete and other washout wastes.
- f. Drainage and Grading.
1. Plan submittals shall be developed in accordance with the Permanent Stormwater Design Checklist shown in Appendix A. (0.5 acres and over sites only or if requested by SWPPP reviewer for sites under 0.5 acres)
 2. Identification of proposed contour grading at vertical intervals of not more than two feet (0.5 acres and over sites only or if requested by SWPPP reviewer for sites under 0.5 acres);
 3. The estimated time required to complete the work, the amount of material to be moved and/or removed from the site;
 4. A map showing the stages or limits of grading together with the existing or proposed finished elevations based on sea level readings;
 5. Identification of proposed building bench elevations and direction of flow of surface water within each lot;
 6. Methods of controlling dust;

7. Submission of preliminary plans or program for water supply, sewage disposal, drainage and flood control (0.5 acres and over sites only or if requested by SWPPP reviewer for sites under 0.5 acres);
 8. Soil borings, if required by the City Engineer; and
 9. Drainage, grading, and land use shall be designed such that water runoff cannot cause flooding (drainage in excess of the natural drainage anticipated by the city stormwater management plan) or erosion on adjacent property. Runoff shall be properly drained via overland drainage ways or channeled into the stormwater system, watercourse, ponding area or other suitable facility approved by the City.
- 3) For all projects that include structural stormwater BMP's the Permittee shall include the name of the responsible party for post construction maintenance along with a detailed maintenance plan. A permanent public easement and recorded Maintenance Agreement is required for all structural BMP's as part of the LDP permit process per Sec. 25-1004 (f)(6).
 - 4) Hydrologic calculations for volume runoff, velocities, and peak flow rates by watershed as defined by Sec. 25-1004(f)(1) **if site disturbance is over 0.5 acres and the impervious surface on site is increasing.**
 - 5) **Calculations for the permanent stormwater treatment system as defined by Sec. 25-1004(f)(2).**
 - 6) **Proof of coverage under the MPCA Construction Stormwater Permit if applicable.**
- (k) *Land Disturbance Activity Standards.* All land disturbing activities must comply with the approved SWPPP and/or appropriate BMPs as referenced in the Erosion and Sediment Control Section of this Ordinance until the land disturbance permit is terminated or the project reaches final stabilization. Each non-compliant BMP (e.g. perimeter controls, inlet protections, concrete washout) shall be considered a separate violation of this Ordinance.
- (l) *Duration of Coverage by Land Disturbance Permit.* A LDP shall remain effective until one of the following occurs:
- 1) Final Stabilization. Final Stabilization is achieved, a Notice of Termination (NOT) has been filed with the City, all termination of coverage requirements are met and the City has issued the NOT; or
 - 2) Time Requirement Reached. The LDP becomes void if work does not begin within 180 days of permit approval or is suspended at any time for over 180 days. Extensions may be granted upon requests received at least 15 days prior to

permit becoming void. If a permit becomes void, the permit application process will begin anew; or

- 3) Change of Coverage. For stormwater discharges from construction projects where the Owner changes prior to issuing NOT (e.g. a homebuilder sells a house and lot to the final homebuyer or the entire site changes ownership):
 - a. The original/current applicant shall provide a copy of the notice of termination/permit modification form and fact sheet to the new applicant.
 - b. The original/current applicant shall provide the SWPPP, or equivalent plan, to the new applicant that specifically addresses the remaining construction activity. If the SWPPP or equivalent plan is not relevant, or the new applicant wants to use a new plan, this must be submitted with the notice of termination/permit modification form.
 - c. The new and current applicants shall work together to submit one completed and signed permit modification form to the City within seven (7) calendar days of assuming operational control of the site, commencing work on their portion of the site, or of the legal transfer, sale, or closing on the property. No new fees will be required.
 - d. The change of coverage becomes effective five (5) calendar days from receipt of the completed form unless the Permittee is contacted by the City during the five (5) day period and notified of an incomplete form. The permit modification portion of the permit modification form acts as the permit application for the new applicant and a NOT for the current applicant only for the portion of the site which was sold.
 - e. Late submittals of either LDP transfers will not be rejected, however, the City reserves the right to pursue enforcement actions for any unpermitted discharges or permit noncompliance for the new registered party that has assumed control of the site.
 - f. For stormwater discharges from construction activities where the applicant changes, the new applicant can implement the original SWPPP created for the project or develop and implement a new SWPPP.
 - g. The new Permittee shall ensure either directly or through coordination with the old Permittee that their SWPPP meets all terms and conditions of this ordinance and that their activities do not render ineffective another party's erosion prevention and sediment control BMP's.

(m) *Termination of LDP Coverage.* A Permittee wishing to terminate the LDP must complete Final Stabilization of the Parcel of Record and submit a Notice of Termination (NOT) request. Requests for NOT are done by completing the NOT

supplied with the permit; or using other proper NOT communication (phone call, e-mail) and submitting it to the Director or designee as provided with the notice of coverage.

Compliance with the LDP is required until a NOT is submitted and approved by the City. The NOT becomes effective fifteen (15) calendar days after the postmarked date of the completed NOT form or other proper notification, unless the Permittee is contacted by the City during the fifteen (15) day period and notified of an incomplete NOT. As-built drawings for all stormwater structures must be provided to the City of Fairmont before a NOT can be processed by the city. All other Land Disturbance Permits must show that all stormwater structures are in compliance with the grading plan. A notice of permit termination will be issued once the termination is approved.

(n) *Land Disturbance Inspections.* The City shall have the right to enter and inspect a property to determine compliance with this ordinance.

1) *Self Inspections.* The Permittee or their designee must make regular inspections of all the BMPs and the entire site at least once every seven (7) days during active construction and within twenty-four (24) hours after a rainfall event greater than 0.5 inches in 24 hours. Records of these inspections shall be made available to the City upon request.

2) *City Inspections.* The Director and/or their designee shall make inspections and either approve that portion of completed work or notify the Permittee where work is non-compliant. The LDP fee shall cover the cost of routine inspections. Additional inspections due to noncompliance may be billed to the affected property owner at 2.5 times the base hourly salary of the Inspector.

(o) *Post Construction Maintenance.* Property owner shall maintain all stormwater facilities in proper condition consistent with the performance standards for which they were originally designed.

Sec. 25-1004.-Stormwater Management Performance Standards and Design Criteria.

(a) The performance standards and design criteria in this section shall only apply to sites in which land disturbance is equal to or greater than 0.5 acres or is located with in a common plan of development.

(b) *Reducing Need for Stormwater Management.* The applicant shall consider reducing the need for stormwater management structural controls by incorporating the use of natural topography and land cover such as natural swales and depressions as they exist before development to the degree that they can accommodate the additional flow of water without compromising the integrity or quality of the receiving water body. The development shall minimize impact to significant natural features.

- (c) *Shoreland Development.* Stormwater management of shoreland development shall comply with the standards set forth in Fairmont City Code. In designated shoreland areas the development shall meet the impervious surface requirements of the shoreland ordinance regardless of conveyance systems.
- (d) *Use of Existing Facilities.* If stormwater is conveyed to an existing approved, on-site or regional stormwater ponding/retention facility, documentation must be provided to show that the existing facility was designed to accommodate the changes in stormwater rate and volume due to the project and that use of the facility for the project will not impinge on the ultimate capacity of the facility or otherwise adversely affect the ability of the facility to achieve its original planned purpose. City may charge a fee for use of any existing facility that is commensurate with the replacement cost for any reduction in ultimate stormwater volume, rate capacity and sediment storage.
- (e) *Requirements.* Proposed design, suggested location and phased implementation of effective, practicable stormwater management measures shall be designed, engineered and implemented to achieve the following results:
- (f) Post Construction Stormwater Standards.
- 1) *Rate Control Standards.* The following rate control standards shall be met as described below for all development and redevelopment projects where land disturbing activity occurs on (0.5) acres or more.
- a. Discharge rates shall be derived using the standards methods of the Natural Resources Conservation Service TR-55 or TR-20 as defined in the current Hydrology Guide for Minnesota.
 - b. For agricultural land subject to this section, the maximum runoff curve number (RCN) used in such calculations for pre-existing undeveloped conditions shall be based on average cultivated row crop conditions and shall not exceed 67 for Hydrologic Soil Group (HSG) A, 76 for hydrologic soil group B, 83 for HSG C, and 86 for HSG D. The TR-55-specified curve numbers for other land uses shall be used. Post development HSG for disturbed sites will be lowered one class for hydrologic calculations to reflect reduced soil permeability impacts unless city approved practices have been implemented to restore soil structure to pre-developed conditions, in which case no HSG class modification is required.
 - c. Maintain pre-project peak runoff rates for the 2-year, 24-hour storm event.
 - d. Maintain pre-project peak runoff rates for the 10-year, 24-hour storm event. At a minimum the storm sewer conveyance system shall be designed for this storm event. Low areas must have an acceptable overland drainage route with the proper transfer capacity when the storm event is exceeded.

- e. Maintain pre-project peak runoff rates for the 100-year, 24-hour storm event. Provide stabilized outlet to safely pass this event.
 - f. Outlets. Discharges from new construction sites must have a stable outlet capable of carrying designed flow at a nonerosive velocity. Outlet design must consider flow capacity and flow duration. This requirement applies to both the site outlet and the ultimate outlet to stormwater conveyance or water body.
- 2) *Volume and Pollution Control Standards.* The following volume and pollution control standards shall be met as described below for all development and redevelopment projects where land disturbing activities occur on 1 acre or more. Development or redevelopment projects less than one acre that are part of a larger common plan of development are also subject to the volume and pollution control standards of this ordinance.
- a. Treat the water quality volume on any project where the sum of the new impervious surface and fully reconstructed impervious surface equals one or more acres.
 - b. For construction activity (excluding linear projects), the water quality volume must be calculated as one (1) inch times the sum of the new and fully reconstructed impervious surface.
 - c. Volume reduction practices (e.g. infiltration or other) to retain the water quality volume on-site must be considered first when designing the permanent stormwater treatment system. Wet sedimentation basins and filtration systems are not considered volume reduction practices. If infiltration is prohibited on site the use of wet sedimentation basins, or filtration basin systems may be considered.
 - d. Volume reduction techniques that will be considered shall include infiltration, reuse & rainwater harvesting, and/or other techniques included in the Minimal Impact Design Standard (MIDS) or the Minnesota Stormwater Manual.
 - e. For projects where infiltration practices are prohibited, or soil conditions prevent infiltration the water quality volume must be treated using wet sedimentation or filtration removing 60% of the annual TP load and 80% of the annual Total Suspended Solids (TSS) load from the sum of the new and fully reconstructed impervious surfaces.
 - f. On projects where wet sedimentation or infiltration are allowed by the City, volume reduction practices shall be maximized unless prohibited.
 - g. To the maximum extent practicable, volume and pollution control

measures should be distributed evenly throughout the development areas.

- h. For linear projects, the water quality volume must be calculated as the larger of one (1) inch times the new impervious surface or one-half (0.5) inches times the sum of the new and fully reconstructed impervious surface. Where the entire water quality volume cannot be treated within the existing right-of-way, a reasonable attempt to obtain additional right-of-way, easement, or other permission to treat stormwater during the project planning process must be made. Volume reduction practices are not required if the practices cannot be provided cost effectively. If additional right-of-way, easements, or other permission cannot be obtained, owners of the construction activity must maximize the treatment of the water quality volume prior to discharge from the MS4.
- i. For non-linear projects, where the water quality volume cannot cost effectively be treated on the site of the original construction activity, the permittee shall identify locations where off-site treatment projects can be completed. If the entire water quality volume is not addressed on the site of the original construction activity, the remaining water quality volume must be addressed through off-site treatment and at a minimum, ensure the requirements of items (j-1) below are met.
- j. Off-site treatment projects areas shall be selected in the following order of preference.
 - 1. Locations that yield the benefits to the same receiving water that receives runoff from the original construction activity.
 - 2. Locations with the same Department of Natural Resources (DNR) catchment area as the original construction activity.
 - 3. Locations in the next adjacent DNR catchment are up-stream.
 - 4. Locations anywhere within the City of Fairmont.
- k. Off-site treatment projects must involve the creation of new structural stormwater BMPs or the retrofit of existing structural stormwater BMPs, or the use of a properly designed regional structural stormwater BMP. Routine maintenance of structural stormwater BMPs already constructed cannot be used to meet permit requirements.
- l. Off-site treatment projects must be completed no later than 24 months after the start of the original construction activity.
- m. Green infrastructure techniques and practices (including, but not limited to, infiltration, evapotranspiration, reuse/harvesting, conservation design, urban forestry, green roofs), shall be given preference as design options.
- n. Best management practices must meet design specifications as outlined and

incorporated in Appendix A of this Code – *Permanent Stormwater Design Checklist*.

- o. As sites redevelop, the proposed site modifications must meet or exceed the stormwater volume standards that were previously achieved.
- 3) *Review and Approval*. All stormwater design calculations, specifications, site plans and supporting hydraulic modeling are subject to the review and approval of the City Engineer or its designee.
- 4) *Soil Boring and Approval*. A minimum of one soil boring shall be done where a proposed infiltration or filtration site is located on the project site to insure it meets the requirements for infiltration rate and it does not contain any contaminated soil.
- 5) *Stormwater Facility Maintenance*. Property owner shall maintain all stormwater facilities in proper condition consistent with the performance standards for which they were originally designed.
- 6) Post Construction Maintenance and Inspections of Structural Stormwater BMPs.

Any structural stormwater BMPs that the City determines to be private shall meet the following requirements:

- a. A permanent public easement shall be provided to the City for access for inspection, maintenance and repair, purposes. Costs incurred by the City for any maintenance of private systems will be billed and/or assessed to the owner per Sec. 25-1005. *Violations and Enforcement*.
- b. The owner shall enter into a Maintenance Agreement with the City. The agreement shall include as an attachment an inspection and maintenance plan. The terms and conditions of the Maintenance Agreement with attachments shall be binding upon and shall inure to the benefit of the parties and their respective successors and assigns.
- c. The permanent public easement and Maintenance Agreement shall be recorded with the County Recorder or Registrar of Titles in the respective County where the Structural Stormwater BMP is located. A copy of the recorded permanent public easement and Maintenance Agreement shall be provided to the City prior to the certificate of occupancy or one (1) year after the site's land disturbance permit is approved, whichever comes later.
- d. The inspection and maintenance plan shall be developed, approved, and included as an attachment with the Maintenance Agreement. At a minimum, maintenance plans must include the following information:

1. Responsible person(s) for completing inspections and conducting maintenance;
 2. Frequency of inspections of maintenance; and
 3. Inspection checklist and type of maintenance anticipated.
- e. If site configurations or structural stormwater BMPs change, decreasing BMP effectiveness, new or improved structural stormwater BMPs must be designed and implemented to meet the requirements of this section. New and/or improved BMP plans must be submitted to the City Engineer for review and approval.
 - f. The property owner shall maintain all structural stormwater BMPs in proper condition consistent with the performance standards for which they were originally designed.
 - g. The property owner shall keep on file all structural stormwater BMP annual inspection and maintenance records for 5 years and submit to the City as requested.
- 7) Public Structural Stormwater BMPs and Drainage Easements.
- a. Alterations affecting the function of a public structural BMP, and/or drainage easement, must be approved by the City Engineer.

Sec. 25-1005.-Violations and Enforcement.

- (a) *Violation Enforcement.* It shall be unlawful for any person to violate any provision or fail to comply with any of the requirements of this ordinance. Any person who has violated or continues to violate the provisions of this ordinance, may be subject to the enforcement actions outlined in this ordinance or may be restrained by injunction or otherwise abated in a manner provided by law. It is the duty of the Director or designee to enforce the provisions of this ordinance, including the power to inspect private premises and issue orders for abatement.
- (b) *Right of Entry.* In the event the violation constitutes an immediate danger to public health or public safety, the City is authorized to enter the property, without prior notice, to take any and all measures necessary to abate the violation and/or restore the property, at the owner's expense. The City will pursue measures to recover all costs associated with the restoration.
- (c) *Stormwater System Service Suspension.* The Director or designee may suspend MS4 service when necessary to stop an actual or threatened discharge which presents or may present an imminent or substantial danger to public health or safety, the environment, or the stormwater system, or would cause the City to violate any

condition of its NPDES Stormwater Permit. Any user notified of a suspension of the stormwater system service shall immediately stop the discharge. In the event the user fails to comply voluntarily with the suspension order, the Director or designee shall take steps as deemed necessary, including immediate severance of the stormwater connection, to prevent or minimize damage to the system, public health or public safety. The Director or designee shall reinstate the stormwater system service upon proof of elimination of the non-complying discharge.

- (d) *Stop Work Order.* The City may issue a Stop Work Order in the event of: immediate danger to public health and safety, or the environment; noncompliance with this Ordinance or a Land Disturbance Permit; failure to obtain a Land Disturbance Permit; Land Disturbance Permit was issued based on incorrect information.
- 1) Only work to remedy the Stop Work Order will be allowed. The Stop Work Order will state what remedial work is necessary and state the time limits for completing the remedial work.
 - 2) If necessary remedial work is not begun or completed by the violator as specified in the stop work order, the abatement of the violation will be under the direction of the Director, or designee. The expenses for the abatement will include a \$75.00 administrative fee in addition to the actual costs of the abatement. Abatement actions that require the presence of City inspection staff for more than one hour during the abatement or other extraordinary coordination efforts will be billed to the property owner at the rate of \$150.00 per hour. If abatement expenses are not paid, they will be levied against the property as a special assessment and collected as in the case of other special assessments
 - a. A \$50.00 charge will be added to all accounts certified to the County Auditor's office for collection. This fee is to be considered separate and distinct from any penalty or interest that may be charged by the County as a result of the certification.
 - 3) Upon successful remediation of the land disturbing activity, the Stop Work Order will be lifted.
- (e) *Land Disturbance Permit Revocation.* If the violator refuses or fails to cease work after the Stop Work Order, the City shall revoke the LDP.
- (f) *Notice of Violation.* Whenever the Director or designee finds that any person has violated or is violating this ordinance where an immediate public health threat does not exist, the Director or designee shall issue a notice of violation and order to correct by personal service, regular mail or electronic mail. The notice of violation and order to correct will be served upon the property owners, responsible parties, violators, Permittees, and/or other responsible persons. The notice will require corrective measures to be taken within a specified time period.
- (g) *Abatement of Violation.* If, after service of notice, the person served fails to abate the violation or make the necessary repairs, alterations or changes as required by the order of the City of Fairmont, the same may be abated under the direction of the

Director or designee. The expenses for the abatement will include a \$75.00 administrative fee in addition to the actual costs of the abatement. Abatement actions that require the presence of **City inspection staff** for more than one hour during the abatement or other extraordinary coordination efforts will be billed to the property owner at the rate of \$150.00 per hour. If abatement expenses are not paid, they will be levied against the property as a special assessment and collected as in the case of other special assessments

- 1) A \$50.00 charge will be added to all accounts certified to the County Auditor's office for collection. This fee is to be considered separate and distinct from any penalty or interest that may be charged by the County as a result of the certification.

Sec. 25-1006.-Penalties.

- (a) *Administrative Citations.* Notwithstanding any other section of this ordinance, any person who is found to have violated any provision of this ordinance, or permits and orders issued hereunder, may be fined in an amount not to exceed \$2,000 per violation. Each calendar day on which noncompliance shall occur or continue shall be deemed a separate and distinct violation. Unpaid charges, fines and penalties shall constitute a lien against the individual user's property. The process for citations shall follow the City's Administrative Citation Process.
- (b) *Criminal Penalties.* Any person violating any of the provisions of this ordinance may be guilty of a misdemeanor punishable by a fine of not more than \$1,000.00, or by imprisonment not to exceed 90 days, or both.
- (c) *Permit Fee Doubled.* No construction, installation, alteration or repair, for which a land disturbance permit is required, will commence without first obtaining the land disturbance permit. A violation of this permit requirement will result in the permit fee being doubled.

PASSED, APPROVED AND ADOPTED THIS 26th day of September 2022.

Deborah J. Foster, Mayor

Patricia J. Monsen, City Clerk

1st Reading: September 12, 2022

2nd Reading: September 26, 2022

Appendix A – Site Plan Checklist

All site plan sheets submitted shall be legible and drawn to scale with north arrow shown. Plans sheets shall be dated and document the name of person or company/organization that prepared the plans.

1) EXISTING CONDITIONS

- a) Limits of land disturbing activities
- b) Lot lines, corners, and dimensions
- c) Address of the property
- d) Structures and impervious surfaces
- e) Streets shown and labeled
- f) Private and public utilities extending 60' beyond the property and/or project site.
- g) Existing drainage, utility, or other easements on the site.
- h) Location of existing lakes, creeks, or wetlands on or adjacent to the site, including ordinary high-water level.
- i) Existing vegetation (grass, woods, landscaping, etc.)
- j) Existing drainage ways (swale, storm sewer, tile, etc.) onsite and flow direction
- k) Existing topography drawn in 2-foot contours as dashed line and labeled, extending 100 feet beyond site boundary to accurately depict the drainage patterns.

2) CONSTRUCTION SITE PLANS

- a) All information required for existing, as applicable
- b) Ultimate (when property is fully developed) impervious and pervious surface of the site shown.
- c) Development schedule: show phasing and calendar year each phase is planned for construction.
- d) Property limits shown. Streets labeled. Lot and block information shown if platted. Street address shown if unplatted.
- e) Areas not to be disturbed clearly defined.
- f) Location and dimensions of all proposed structures.
- g) Location of new impervious surfaces and type.
- h) Location of new vegetation/landscaping.
- i) Location of all proposed utilities including size, type, materials, depth, invert elevations, and rim elevations.
- j) Proposed topography drawn in 2-foot contours as solid lines and labeled.
- k) Proposed drainage, utility, or temporary construction easements shown and labeled on the plan.
- l) Control/spot elevations for drainage ways provided.
- m) 100-year flow contained in easement.
- n) Minimum slope of side lot drainage swales is 2%, direction arrow shown.
- o) Minimum back lot drainage swale slope is 1%, direction arrow shown.
- p) Building pads, type of house to be built, garage floor elevation, lowest floor elevation and lowest opening elevation are shown.
- q) Driveway slope, from garage to the gutter is shown.

- r) Lowest opening elevation: min. 2 feet above 100-year HWL, and min. 1 foot above emergency overflow elevation.
 - s) For stormwater plans, follow the permanent stormwater design checklist, Appendix B
- 3) **BUILDING AND ZONING SITE PLANS** (additional information may be needed contact building and zoning departments complete requirements)
- a) Location and dimensions of all proposed structures.
 - b) Lot lines, corners, and dimensions
 - c) Property limits shown. Streets labeled. Lot and block information shown if platted. Street address shown if unplatted.
 - d) Location of new impervious surfaces and type.
 - e) Location of new vegetation/landscaping.
 - f) Building pads, type of house to be built, garage floor elevation, lowest floor elevation and lowest opening elevation are shown.
 - g) Dimensions from structures to property lines
 - h) Dimensions between other structures on the site.
 - i) Existing zoning classification for land within project location and abutting,
 - j) Number of parking spaces provided and required including handicapped. Include stall size.
 - k) Total size of the parcel(s)
 - l) Existing and proposed easements

Appendix B – Permanent Stormwater Design Checklist

Proposed drainage plan and calculations shall be prepared in accordance with the current City standards for volume, rate, and water quality control as outlined in the City’s Stormwater Management Code, Sec. 25-1004.

1) GENERAL

- a) Proposed drainage plan, hydraulic calculations and **stormwater treatment calculations** are dated and signed by a licensed professional.
- b) Owner, engineer and architect name, address, phone and email listed.
- c) **Sum of the new and fully reconstructed impervious surfaces**
- d) On-site soil characteristics: Boundaries of different soil types are described. Groundwater elevations are shown.
- e) Existing drainage: Show pre-developed drainage areas, land use and the direction of flow for each area and travel path used to determine the Time of Concentration.
- f) Final drainage: Show post-developed drainage areas, land use and the direction of flow for each area and travel path used to determine the Time of Concentration.
- g) Identify off-site catchment areas draining to the site. Provide 2-foot contours. Show land use and the direction of flow for each area and travel path used to determine the Time of Concentration.
- h) A long-term inspection and maintenance plan for all permanent stormwater treatment practices is required to be submitted with the SWPPP.
- i) **Table showing the water quality volume that will be treated though volume reduction practices and the volume of water that will be treated though other methods.**
- j) **Documentation and rationale to explain why volume reduction practices will not work on the project if using filtration or wet sedimentation for water quality volume treatment.**
- k) **Rationale and documentation supporting the location of any off-site permanent stormwater treatment projects.**

2) STORM DRAIN SYSTEM, INLETS, AND OVERFLOWS

- a) Storm drain system design - Rainfall frequency shall be based on Atlas 14 precipitation frequency estimates.
- b) Pipe size, length, grade and material shown.
- c) Top of castings and all inverts of catch basins and manholes shown. Label storm drain structures.
- d) All apron elevations (inlets and outlets) shown.
- e) 400-foot maximum manhole spacing.
- f) Flow direction change ≤ 90 degrees at junctions is desirable.
- g) Apron inlets to storm sewer system shall include trash guards. Trash guards are optional on true culverts.
- h) Discharge direction of flow generally 45 degrees or less to the flow direction of receiving ditch or stream.
- i) Overflow design to be considered for events greater than storm sewer system design event.

3) **PERMANENT PONDS**

- a) Entire drainage/service area shown (in the report).
- b) Grading plan with pond cross section. All apron elevations (inlet and outlet) shown.
- c) Hydraulic calculations for ponding provided. 100-year high water level shown. and normal water level shown.
- d) Permanent ponds must be designed to provide live storage for the water quality volume calculated onsite.
- e) Where possible, provide a forebay at the inlet; locate inlet and outlet at opposite ends of pond; and provide length to width ratio 3:1.
- f) Multi-cell design where practical.
- g) Pond side slopes shall not exceed 4 feet horizontal to 1 foot vertical (4:1) above normal water level.
- h) 10:1 bench is provided for first 1 foot of depth below normal water elevation.
- i) The permanent pool must reach a minimum of 3 feet, stay below 10 feet, and be configured to minimize scour and re-suspension of solids. Vegetation and slope stabilization methods are subject to City's approval.
- j) Outlet is designed to prevent short-circuiting and discharge of floating debris.
- k) Permanent pool volume 1,800 cf per acre drained (minimum).
- l) Outlet sized to discharge water quality volume at no more than 5.66 cfs/acre of pond surface area.
- m) Energy dissipation on outlet piping.
- n) Emergency overflow spillway provided to accommodate storms greater than the 100-year event. High point elevation and direction of overflow are marked on plans. Top of berm is 1 foot above emergency overflow spillway.
- o) Emergency overflow spillway is located to protect adjacent property and large fill sections.
- p) Minimum 8-foot width at top of berm.
- q) 12-foot-wide access and turn-around area for maintenance vehicles is shown on a slope $\leq 15\%$, cross slope $\leq 6\%$.
- r) Pond access is included in a min. 15-foot-wide portion of the pond outlot. If access is in an easement across private property, a 12-foot-wide access road shall be provided.
- s) Ponds shall not be located in a wetland unless mitigated for.
- t) As part of the drawing set submittal, provide in table form the following information:
 - i) Elevation of normal water level (NWL).
 - ii) Elevation of 100-year high water level (HWL), with respective discharge rate.
 - iii) Elevation of water quality water level, with respective discharge rate, and pond water surface in sq. ft.
 - iv) Sediment storage volume (for sediment accumulation during construction and 20 years thereafter).

4) **INFILTRATION/FILTRATION**

- a) Refer to the Minnesota Stormwater Manual for specific infiltration/filtration practices.

- b) Infiltration and filtration systems must be designed so that pre-existing hydrologic conditions of the wetlands in the vicinity are not impacted.
- c) Infiltration systems shall meet volume control standards as set by the City.
- d) Filtration systems shall be designed to treat the water quality volume calculated for the site.
- e) Filtration systems shall achieve at least 80% removal of total suspended solids.
- f) Infiltration or filtration systems should not be excavated to final grade until the contributing drainage area has been constructed and fully stabilized.
- g) During construction of infiltration or filtration systems, rigorous erosion prevention and sediment controls (e.g. diversion berms) should be used to keep sediment and runoff completely away from the infiltration or filtration area. The area must be staked off and marked so that heavy construction equipment will not compact the soil in the proposed infiltration or filtration area.
- h) A pretreatment device such as a vegetated filter strip, small sedimentation basin, or water quality inlet (e.g. grit chamber) is required before the stormwater discharges into the infiltration or filtration system. The Minnesota Stormwater Manual and Minimal Impact Design Standards (MIDS) shall be used when sizing and designing pre-treatment.
- i) Pre-treatment sumps shall have a minimum 3-foot sump depth.
- j) Area to be infiltrated or filtrated shall be delineated on plans.
- k) Calculations or computer model results that demonstrate the design adequacy of the infiltration or filtration system must be included as part of the SWPPP.
- l) The water quality volume shall discharge through the soil surface or filter media in 48 hours or less. Additional flows that cannot be infiltrated or filtered in 48 hours should be routed to bypass the system through a stabilized discharge point. A way to visually verify that the system is as designed must be provided.
- m) Appropriate on-site testing is required and must be consistent with the recommendations in the Minnesota Stormwater Manual. Testing shall be conducted to verify soil types, infiltration capacity characteristics, and to ensure a minimum of 3 feet of separation from the seasonally saturated soils and the bottom of the proposed infiltration system.
- n) Provide at a minimum one soil boring, test pit, or infiltrometer test in the location of the infiltration practice for determining infiltration rates.--+
- o) For design purposes, permittees must divide field measured infiltration rates by 2 as a safety factor or owners/operators of construction activity can use soil-boring results with the infiltration rate chart in the Minnesota Stormwater Manual to determine design infiltration rates. When the soil borings indicate type A soils, field measurements shall be performed to verify the rate is not above 8.3 inches per hour.
- p) Adequate maintenance access must be provided (typically 12 ft. wide).
- q) Provide scaled drawing of infiltration or filtration BMP, with typical detail and typical cross section. Outline area which runoff is directed to the BMP. As part of the drawing set submittal, provide in table form the following information:

For Infiltration BMP:

- i) Runoff volume directed to infiltration BMP in cu. ft.
- ii) Storage volume of infiltration BMP in cu. ft.
- iii) Time of infiltration in hours (must be ≤ 48 hours).
- iv) Separation in feet between the ground water table and the bottom of BMP.

For Filtration BMP:

- v) Runoff volume directed to filtration BMP in cu. ft.
- vi) Percent of TSS reduction level.
- vii) Percent of TP reduction level.
- viii) Time of filtration in hours (must be ≤ 48 hours).

6) **INFILTRATION PROHIBITIONS AND RESTRICTIONS**

- a) Infiltration is prohibited when the infiltration BMP will receive discharges from, or be constructed in areas:
 - i) Where vehicle fueling and maintenance occur, regardless of the amount of new and fully reconstructed impervious surface.
 - ii) Where high levels of contaminants in soil or groundwater will be mobilized by the infiltrating stormwater. To make this determination, the owners and/or operators of construction activity must complete the MPCA's site screening assessment checklist, which is available in the Minnesota Stormwater Manual, or conduct their own assessment. The assessment must be retained with the site plans and submitted to the City.
 - iii) Where soil infiltration rates are more than 8.3 inches per hour unless soils are amended to slow the infiltration rate below 8.3 inches per hour.
 - iv) With less than three (3) feet of separation distance from the bottom of the infiltration system to the elevation of the seasonally saturated soils or the top of bedrock
 - v) With predominately Hydrologic Soil Group D (clay) soils
 - vi) Within 1,000 feet up-gradient, or 100 feet down-gradient of active karst features
 - vii) Where industrial facilities are not authorized to infiltrate industrial stormwater under an NPDES/SDS Industrial Stormwater Permit issued by the MPCA, automobile salvage yards, scrap recycling and waste facilities, hazardous waste treatment, storage, or disposal facilities, or air transportation facilities that conduct deicing activities.

7) **BETTER SITE DESIGN/LOW IMPACT DEVELOPMENT**

- a) Green Infrastructure techniques and practices (including, but not limited to, infiltration, evapotranspiration, reuse/harvesting, conservation design, urban forestry, green roofs), shall be given preference as design options.
- b) Additional low impact development design features shall be considered and indicated on the plans such as preserving natural areas, site reforestation, stream and shoreline buffers, soil compost amendments, disconnecting of surface impervious cover, and stormwater landscaping.

Fairmont City Council
September 26, 2022

Agenda Item: 8.3

From: Cathy Reynolds, City Administrator
To: Mayor and City Council

Subject: Charter Commission Additional Budget Request

Policy/Action Requested: Motion to approve the Charter Commission's request for an additional \$2500 to be allocated to their 2022 budget.

Vote Required: X Simple Majority Roll Call

Recommendation:

Overview:

Minnesota Statutes 410.06 states that "the amount of reasonable and necessary charter commission expenses that shall be paid by the city is the greater of .07 percent of the city's current certified general property tax levy or \$1500, not to exceed \$20,000 in any on year, but the council may authorize such additional charter commission expenses the commission considers necessary."

For 2022 the amount that the city is statutorily required to support the charter commission with is \$2469. To date the city has expended \$2139.80 on charter commission expenses. This leaves them with a remaining budget of \$329.20. From this balance the charter commission will have additional expenditures for legal fees since July 1, 2022.

At the August 16, 2022 charter commission meeting the commission passed a motion to request that the city council allocate an additional \$2500 to their 2022 budget. The council may grant or deny this request.

Budget Impact:

These funds can come from the money budget for council discretionary spending.
